

## Movias joins the ERTICO Partnership

ERTICO is pleased to announce that Movias has joined its Partnership.

As an innovator and intermediary, [Movias](#) helps shape the smart mobility ecosystem in the Benelux. Movias sees smart mobility as an ecosystem in which the needs of government, businesses and traffic users must be carefully aligned with one another. This is a difficult process. With its network of academic and business partners and years of experience and expertise, Movias can successfully guide governments and businesses through it.

Founded in 2021, Movias is a team of nine mobility experts with more than a hundred years of combined experience across various backgrounds. Their strength is bringing innovation into practice, with particular expertise at the intersection of data, AI and mobility. In the CARE project, for example, they deploy CCAM in the field for safer mobility, and with Gader they have released an agentic product built on dataspace technology. Movias works with governments and businesses through a structured process that runs from business and functional questions to technical implementation, backed by ownership, hands-on project management and client relationships built on earned trust.

*“For Movias, joining ERTICO is a natural next step. Growth means connecting with other organisations and institutes, and within the European ITS community ERTICO is where that happens. In our projects we keep running into ERTICO members and initiatives, so the partnership is a logical place to be. We look forward to exploring collaborations, sharing our experience and getting to know the European community of ITS professionals,”* said Koenraad Verduyn, Smart Mobility Expert at Movias.

The ERTICO Partnership bridges the gaps between stakeholders across the ITS community to help make mobility safer, more efficient and sustainable. Together, we lead the digital transformation of transport through the development of cutting-edge technologies, new services and innovative mobility solutions to move people and goods in smarter ways. Our Partners share the joint mission to actively promote sustainable collaborative relations with EU institutions and policymakers by connecting local and regional transport organisations with national authorities.

Joost Vantomme, CEO of ERTICO – ITS Europe commented: *“Movias exemplifies the type of cross-sector collaboration that is essential for the future of mobility. Their unique ability to bridge innovation, technology and real-world deployment reflects the collaborative spirit that drives our ecosystem. With strong expertise in data, AI and connected mobility, Movias will bring valuable insights and practical experience to our shared mission of advancing smarter and more sustainable mobility across Europe.”*

Joining the ERTICO Partnership is an important way to connect the dots between different sectors across our complex ecosystem. The Partnership enables close collaboration between stakeholders by coordinating the planning and deployment of intelligent transport systems and smart mobility solutions in Europe and beyond.
