

PRESS RELEASE

Giesecke+Devrient joins the ERTICO Partnership

ERTICO is pleased to announce that Giesecke+Devrient has joined its Partnership.

Giesecke+Devrient (G+D) contributes proven expertise in intelligent transport systems, secure connectivity, eSIM technology, IoT connectivity and digital security to the mobility ecosystem. Its trusted and scalable connectivity solutions help enable secure communication across connected vehicles, infrastructure, devices and mobility platforms.

By joining ERTICO, G+D aims to deepen collaboration with mobility, transport, technology and public-sector stakeholders across Europe. The Partnership provides a valuable platform to exchange expertise, contribute to collaborative innovation and support the deployment of trusted digital solutions for intelligent transport systems.

G+D brings experience from European research and innovation initiatives related to trust, secure connectivity, resilient digital infrastructures and mobility, including projects such as LIGHTest, RESCUE and NextArc. Its connectivity and security expertise is also relevant for large-scale connected mobility use cases such as Spain's V16 connected emergency beacon ecosystem. Building on selected capabilities across its wider security technology portfolio, including Digital Offerings, secure connectivity, eSIM, IoT connectivity, secure identity for people and products, and payment technologies, G+D supports trusted digital infrastructures for the future of mobility.

BeeGek Lim, Head of Business Line Digital Offerings at G+D Mobile Security commented:

"Intelligent mobility depends on secure, scalable and trusted digital infrastructure. By joining ERTICO, we look forward to contributing G+D's proven expertise in eSIM, IoT connectivity, secure identity and digital security to a European ecosystem that is advancing safer, smarter and more sustainable transport."

Through the Partnership, G+D will engage with public and private stakeholders to support secure, efficient and sustainable mobility solutions in Europe and beyond.

As mobility becomes increasingly connected and data-driven, trust and security are becoming essential foundations for the deployment of intelligent transport solutions. G+D's expertise therefore brings a valuable perspective to ERTICO's cross-sector community.

Welcoming G+D to the Partnership, **Joost Vantomme, CEO of ERTICO – ITS Europe**, said:

"The future of mobility will depend not only on how connected our transport systems become, but also on how securely and reliably those connections can operate. G+D brings strong expertise in trusted digital infrastructure, secure connectivity and digital security, which complements the diverse capabilities already present within the ERTICO Partnership. We are delighted to welcome them to our community and look forward to connecting their expertise with Partners across sectors to help advance the next generation of intelligent mobility."

At the heart of ERTICO is a unique cross-sector ecosystem that brings together diverse perspectives and capabilities to address shared mobility challenges. By connecting organisations across sectors and borders, the Partnership helps turn innovative ideas and technologies into scalable solutions that support smarter, safer and more sustainable mobility.
