

Brussels Mobility joins the ERTICO Partnership

ERTICO is pleased to announce that Brussels Mobility has joined its Partnership.

Brussels Mobility is the public administration of the Brussels-Capital Region responsible for mobility. Its responsibilities include developing mobility strategies, enhancing road safety, maintaining sidewalks, paving roads, constructing bike paths, and implementing major infrastructure projects (tunnels, bridges, metro stations). It also monitors traffic, coordinates worksites, and regulates the transportation sector (taxis, driving schools, technical inspections).

Brussels Mobility hopes that joining ERTICO will provide opportunities to connect with other experts across the sector and exchange knowledge on areas such as automated driving, the electrification of mobility and other emerging mobility innovations.

"The Brussels-Capital Region is an internationally significant crossroads for national and international traffic - air, rail, and road alike - which is precisely why it is also the place where innovation can deliver its greatest benefit," highlights Christophe Vanoerbeek, Director General of Brussels Mobility.

Brussels Mobility's expertise and perspective as a public authority will further strengthen ERTICO's multi-sector Partnership, where public authorities, industry, research organisations and mobility stakeholders work together to turn innovation into real-world solutions. Its participation will create new opportunities for knowledge exchange and collaboration in areas such as connected and automated mobility, electrification and the deployment of innovative mobility solutions in an urban environment.

Welcoming Brussels Mobility to the Partnership, **Joost Vantomme, CEO of ERTICO – ITS Europe**, said: *"We are very pleased to welcome Brussels Mobility to the ERTICO Partnership. Brussels is not only at the heart of Europe, but also a complex and dynamic urban mobility environment where many of the challenges and opportunities shaping the future of transport come together. Brussels Mobility brings valuable public-sector expertise to our Partnership, and we look forward to connecting that experience with our wider European community to advance innovative, connected and sustainable mobility solutions."*

Joining the ERTICO Partnership provides a unique opportunity to connect across sectors and bring together diverse expertise from across the mobility ecosystem. Through close collaboration and knowledge exchange, Partners work together to support the development and deployment of intelligent transport systems and smart mobility solutions across Europe and beyond.
