Apply to Host the 2025-2026 ITS European or ITS World Congress 2027

Brussels, Belgium. 8 April 2022. ERTICO launches the Call for Tender to host the next two European Congresses, 2025 and 2026, and the next ITS World Congress 2027.

The [its congresses](#) are the perfect platform to allow your city and the broader ecosystem to play a role in the ongoing development of smart mobility. Every year, ERTICO organises the ITS European Congress or Word Congress in the EMEA region.

These events represent a yearly celebration of smart mobility, underling the importance of intelligent transport systems (IS), particularly in cities and regions where they are hosted and are important channels to raise awareness of smart mobility solutions among policymakers, experts and the general public. They include live sessions where industry experts present the latest developments in ITS, a showcase of cutting-edge technologies through demonstrations and a vibrant exhibition.

The Congresses offer stakeholders and patrons the ultimate platform to meet with industry influencers, discuss ideas and initiatives, make new contacts and promote their businesses to 1,000 key players in the industry.

The application to host the prestigious ITS Congress is a two-stage selection process that firstly includes the evaluation of an initial call for interest, including a minimum requirement document, followed by a second stage, namely a full tender process.

Please get in touch with **Delphine Soubies** d.soubies@mail.ertico.com as soon as possible if you wish to participate in the Call for Interest and receive the Minimum Requirements document.

The deadline for this call for interest is **MONDAY 20 JUNE 2022.**
